

Official Safety Statement Coronavirus

Dear reader,

Through this statement, we would like to inform you of the safety measures the CLB Group has taken to continue to ensure the safety of our employees, clients and partners regarding the pandemic. We thank you in advance for your cooperation. The following safety measures currently apply within the CLB Group:

- Work from home unless your responsibilities absolutely do not allow you to do so;
- Keep at least 1,5 meters distance from one another, do not shake hands, cough and sneeze in the inside of your elbow and wash your hands regularly with water and soap;
- When visiting a client wearing a face mask is mandatory;
- If an employee experiences symptoms that can be caused by the coronavirus or has recently been in contact with someone that has tested positive for the coronavirus, they will report this to their manager immediately, stay home and get tested as soon as possible.
- Carpooling is not allowed unless you're part of the same household.

Physical meetings with our client family

Necessary physical meetings with our clients are possible when the above and local (additional) measures are met, the meeting cannot be realized remotely and our employees will not be in direct contact with patients or residents. If we have to work in an active care unit, our employees must be able to keep at least 1.5 meters distance from patients and/or residents. If there's any doubt concerning the necessity or safety of a meeting or visit, we will always contact you before the meeting or visit takes place. Naturally, your and our safety are our top priority.

Delivery of products and (spare) parts

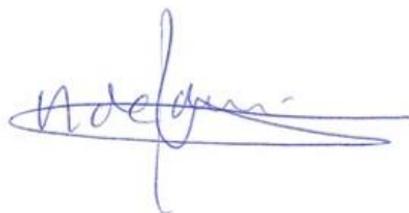

At the moment there are no short term product and (spare) part deficits within the CLB Group. We monitor our supply chain, which is largely within the CLB Group, closely and daily. In case anything changes, we will of course inform you as soon as possible.

How you can help us

We ask you to inform us as soon as possible if the pandemic affects your business operations affiliated with the CLB Group in any way. For example in the event of an infection within your organization, (future) delivery problems or newly identified safety risks. We will then take appropriate action immediately.

Thank you for your continued attention and stay safe.

Kind Regards,

Niels de Bruin
CEO
CLB Group
